

## Honey: removing full honey supers for extraction

1. User:
  - all beekeepers
2. Frequency of use:
  - as required
3. Reasons for recording this information include:
  - business management
    - will keep track of yard honey production
    - record can be linked to other records (e.g., hive assessment) to help make management decisions
    - will help to schedule bee yard work for employees
  - bee biosecurity
    - it is part of overall management to improve bee biosecurity
  - food safety
    - provides a tool for tracing potential contaminants in honey
    - part of overall management to reduce potential contaminants in honey
4. References to the Bee Biosecurity Standard and CBISQT:
  - Bee Biosecurity Standard: pages 32-34
  - CBISQT: pages 47-52, 60-63, 68 and 102
  - this template is an adaptation of CBISQT from 5.0.1 (page 130)
5. General comments:
  - novice beekeepers who produce honey for their household use should record how much honey each hive produces in order to better understand their bees, and the effect of their management and environmental conditions on honey production
